- Business Analytics with Excel and SQL, Power Query | Duke University (Coursera) & Simplilearn
- Power BI and SQL | Ivy Professional School & Simon Sez IT
- IBM Data Engineering | Coursera
- AI Product Management | Microsoft & Udemy

WORK EXPERIENCE

IT SURVEY ANALYST

Bridge Carbon | Jan 2024 - Dec 2025

- Managed the deployment of global data activities using ODK, Upya, and an in-house tool (DISCO); streamlining data collection for user insights for cross-functional teams.
- Effectively communicated key KPIs through Power BI dashboards, enabling stakeholders to enhance data-informed business actions and operational efficiency.
- Developed and deployed interactive Tableau dashboards to visualize user funnels for the Marketing team, improving data consumption and supporting campaign ROI.
- Executed ETL processes using SQL on cloud data technologies (Snowflake, Google BigQuery); reducing latency by 30% for real-time decision-making.

BUSINESS & PRODUCT ANALYST

Testbook.com | Aug 2021 - Aug 2023

- Managed KPI tracking for in-house CRM by creating 10+ dashboards and 100+ queries to identify feature gaps and boosted platform efficiency.
- Developed interactive Looker Studio dashboards for the Sales team and other stakeholders to monitor individual and team performance metrics, leading to a measurable lift in employee engagement.
- Automated data extraction using SQL, MongoDB, and 5+ ETL workflows through Apps Script to deliver real-time insights via Redash and save over 10 hours weekly for product managers.
- Analyzed and Integrated app & web event data covering 2M+ DAUs, approx. 17M+ MAUs, using Python for EDA identifying trends, resolve issues with user events implementing strategies and supported product insights and improvements.

BUSINESS ANALYST INTERN

The Health Company | May 2021 - Aug 2023

- Analyzed historical sales data with Excel/G-Suite to improve inventory turnover.
- Evaluated Ad Campaigns and SKU performance to implement data-driven CAC/LTV strategies, optimizing marketing spend for new products.
- Created automated reports to identify fast-moving and underperforming SKUs, assisting the product team in prioritizing high-margin items and refining acquisition strategies, resulting in a 12% boost in repeat purchase rates.
